	Task	Status	Comment
Tadeo	Inventory Management System	Ongoing	working on getting a specific device's/user's details to load to a form before accepting edited changes. The 'registered devices' and 'unregistered devices tables are yet to be done also.

Planned features yet to implement: a large table to view and or update all asset tags and devices; a more user friendly navigation bar.

Functionalities implemented: Query devices table by asset tag ID; Query all users by name; adding a device; adding a user; editing a user, editing a device; viewing ones owned devices and personal information; sign-in and sign-out. |
